## Electrolux cooling

At Electrolux we have a wide range of fridges and freezers, in different sizes and with various features to help you relax and worry less about safe food storage or defrosting your freezer less often, or even ever again!

# A cool place of total harmony.

This range of cooling products will make a fantastic display in your kitchen - not only will it enhance the look of your kitchen with the fresh design and clean interior - but it will also give you excellent performance with some leading features such as an under counter frost free freezer and large capacity in-column frost free freezer.

### Stylish design

Our range of cooling products is characterised by its horizontal stylish design and top of the range functions, options and performance. This cooling range ensures safe storage of fresh and frozen foods.

### Energy efficiency

As you would expect from Electrolux, all our Built-in cooling products are CFC and HFC free. This means they cause as little harm as possible to the environment.

All models across the range are A rated, with some even A+, which means you are buying the most economical cooling products and saving on your running costs.

### Large capacity

Make the best use of your space with our large capacity fridges and freezers. Our cooling products are designed to optimise and maximise the internal capacity to give you more space inside.

### Flexible storage options

We know that having a range of flexible storage options within the fridge is very important, which is why we have covered salad and dairy compartments, transparent storage drawers, some with a maxi drawer for extra large items, which glide out easily on telescopic runners.
Our glass shelves can be easily adjusted to give multiple shelf positions.

### Frost free

With Electrolux frost free cooling appliances, there's no need to defrost your freezer ever again. You can maximise your storage space, there's no build up of ice in the freezer, fast freezing and defrosting and more storage space. You will have peace of mind, ease of use and convenience all in one.

### Intensive cooling

Activating the intensive cooling function lowers the temperature of the fridge in preparation for the addition of fresh food. Ideal for use when adding shopping.

### Intensive freezing

Adding fresh food to the freezer can lead to a warming of temperature. To ensure that the freezer remains as cold as possible, and to allow for quick freezing of fresh food, then the intensive freezing function should be used. This rapidly lowers the temperature in the freezer, in preparation for additional fresh food.

**ERU14410**

**Under counter larder fridge**

Fridge net capacity 136 litres (4.8 cu.ft)

Automatic defrost

Fridge features:

- Automatic defrost in the fridge - so you don't have to - makes life easy

# Stay cool with our American-style food centre.

This stylish fridge freezer is the perfect solution for your food cooling needs. With water and ice through the door and a range of storage solutions, it is packed with practical features to ensure that your food stays fresh as long as possible.

## Features

### Large salad and vegetable drawer

With convenient carrying handles for easier loading and unloading and easy glide runners for ease of use and for a quality feel. The freshness control and humidity mats within the drawers also ensure the moisture stays away from the food, keeping items fresher for longer.

### Chilled food compartment

Keep your food fresher for twice as long in the chiller compartment. The nutritional value and colour is preserved ensuring healthier and more attractive food.

### Feature lighting

Brighter lighting in your fridge allows you to easily see what is stored in the fridge.

### Temperature alarms

To ensure that you are aware of any problems with your appliance, many models will sound an alarm if the internal temperature rises to an unacceptable level. This is a perfect way of letting you know if there have been any long term power cuts.

### Frost free

Frost free means there is no need to defrost your freezer again. You can maximise your storage space, there's no build up of ice in the freezer, and labels will stay readable. You can simply forget about the problems of defrosting and spend time on more exciting activities.

### Energy efficiency

Our models are 'A' rated for the very best efficiency, saving you money on your running costs.
